

CHRISTMAS

Advent, Advent ein Lichtlein brennt
zuerst eins, dann zwei, dann drei dann vier...
und wenn das fünfte Kerzlein brennt,
dann haste Weihnachten verpennt.

I am very sorry, but it is impossible to translate this....

IVA in China

Maria has now arrived in Yanzhou and was offered a lecturship by the University of Yanzhou.
Congratulations, Maria!
By now she has settled and is full of energy and more than eager to meet as many IVAs as possible. So maybe we should think about this opportunity.

JCCS- Call for papers

It seems that IVA has not too much to say! So far I did not receive any abstracts from you. This certainly is a shame, since the journal's main concerns are the issues we deal in IVA. I do know that there are many interesting studies, and I do not quite understand why everyone is so uninterested in contributing something. Since we want to take the first (and most probably the second) issue to many conferences and other events, it would be necessary that we show what and how good IVA and its members are.

So – frankly speaking – get down to it and just write an article! (before I send out some „Cornetto“ shaped men all dressed in black.....)

Articles and maybe in first place abstracts please send to:

bornberg@iras.uni-hannover.de

TRIALOG

I am currently editing (together with Antje Wemhöner and Jürgen Östereich) an issue of Trialog, a Germany based journal dealing with town planning in the countries of the South. The issue will have the title:

„Die Europäische Stadt. Ein Verkaufsschlager“ (The european city. An export article)

We are looking for articles where problems are discussed that arise in the light of European city models that are implemented all over the world, but do not suffice the social, cultural, environmental and political needs of the particular society.

If anyone wants to contribute an article, please let me know asap.

(maybe this is something for Peter Robinson, Australia??)

emails as usual:

bornberg@iras.uni-hannover.de
